

ABOUT YOUR CHILBLAINS!

What are they? They are a mild form of frost-bite—a chilling of the part to such a degree that inflammation is set up, causing a tingling pain, excessive irritation and often swelling. Zam-Buk cures chilblains by drawing out the inflammation, thus ending the pain and irritation and reducing the swelling.

Miss Annie Layard of Beaverdale, Ont., says: "I suffered agonies from chilblains and used many remedies, but nothing gave me any ease until I used Zam-Buk, which, after a little perseverance, completely rid me of this painful affliction."

Regular applications of Zam-Buk will prevent a recurrence of the trouble. Keep it handy. 60c box.

Canada's Status

Canada's international status has been determined by its inclusion in the League of Nations as a distinct national entity, possessing the same standing and voting power as is accorded to sovereign nations, and obligated to assume the same responsibilities and discharge the same duties as are laid on all other nations.

This is an almost revolutionary change in status to that existing prior to the Great War. When, on August 4, 1914, Great Britain declared war on Germany, Canada, in common with the whole British Empire, was automatically at war. The Canadian Parliament did not make a declaration of war; it merely took official cognizance of the fact that a state of war existed. It remained, however, for the Canadian Parliament to decide the extent of Canada's participation in the war.

In future, however, as a full-fledged member of the League of Nations, Canada will have a voice in deciding issues of peace or war. Canada's vote will count just as effectively as the vote of Great Britain, France, Italy or any other country. This means that, whereas formerly Canada had no foreign policy, because it had no say in foreign affairs. It must decide issues of peace or war for itself.

This change in Canada's international status inevitably calls for some change in its position within the British Empire and in the relations hitherto existing between this Dominion and Great Britain. There are certain anomalies in the present relationship that must be corrected, but which in no wise weaken the Empire, or tend to Canada's withdrawal therefrom; on the contrary, such changes as are necessary should have the effect of adding strength to the Empire.

Recognized as a nation within a

League of Nations, Canada will have direct relations with all other nations and it is almost certain to follow that this Dominion will have its own accredited representatives at the capitals of other countries. The first step in the evolution of this policy is being taken in the appointment of a Canadian Minister to Washington. In the past, if the Canadian Government had representations to make to the United States Government it was necessary to transmit them to the Colonial Office in London, who in turn handed them over to the British foreign office, which sent them on with instructions to the British ambassador at Washington. Replies to such representations had to return via the same route, and all negotiations between Ottawa and Washington had to be conducted through London. In future, we are to have direct dealings with the United States Government through a Canadian Minister at Washington.

Other important constitutional changes are up for discussion at Ottawa. Canada derives its constitution from the British Parliament, through the British North America Act. Any alteration or amendment to that constitution can only be effected by the British Parliament upon address of the Canadian Parliament. It is now proposed that Canada shall be given full power over its own constitution, to amend it from time to time as the people of Canada conceive in their own interest it should be amended and without recourse to the British Parliament. Australia and New Zealand possess such control over their constitution, and the Dominion Minister of Justice is now in negotiation with the several Provincial Governments with a view to having representations made to the British Government and Parliament for the conferring of similar powers upon Canada.

The view has long been held by many Canadians that a change should also be effected in our system of judicial appeals. At present the final court of appeal for Canada is the Judicial Committee of the Privy Council in England. There is a growing belief that so far as Canadian cases are concerned, the Supreme Court of Canada should be made the final court of appeal—that it should be supreme in fact as well as in name, and that all the expense and delay involved in appeals to London should be obviated.

Slowly, but none the less surely, Canada and the other self-governing Dominions of the British Empire seem to be moving towards the ultimate goal of independence in all foreign affairs, just as they have long been independent in all domestic matters. This does not mean that Canada will sever its connection with Britain, nor withdraw from the Empire. Not at all. It has been declared by the Prince of Wales, Lloyd George and others, that Canada is now a nation, a partner of Great Britain, occupying a position of equality with Britain in the Empire. If this is true, and no one disputes it, then existing anomalies whereby in some respects the British Government, Parliament and the courts can exercise a veto over Canada must be removed.

Evolving gradually, the apparent need would seem to be the constitutional establishment of Canada and the other self-governing Dominions as sovereign nations, all owing allegiance to one Crown, flying the same flag, working together in cordial co-operation for the good of all, but each mistress of their own affairs. In a word, a league of British nations within a League of Nations.

Alberta Potatoes for California

Recognition of Quality of Produce Grown in Western Canada

New markets for the potato crop of Alberta have been opened up by the shipment of a whole carload of potatoes consigned from Edmonton to San Francisco.

This shipment practically constitutes the first consignment of the kind ever sent from Edmonton direct to the Pacific Coast. While eastern markets have been plentiful in the past, direct orders for potatoes from California points have seldom reached this city and the placing of such a shipment with a city such as San Francisco is a recognition of the quality of produce grown in the province.

A SPRING TONIC AIDS EFFICIENCY

Lay Foundation of Good Health Now By Building Your Blood and Strengthening Your Nerves

The good old fashion of taking a tonic in the spring, like most of the customs of our grandfathers, is based upon sound common sense and good medical practice. Winter is always a trying time for those who are not in rugged physical health. Many men, women and children go through the winter on nerve strength. They have stored up during the sunny, summer months, and grow increasingly exhausted as the spring days approach. A tonic for the blood and nerves at this time will do much for the body by giving it a new vigor in the checks and banishing that tired feeling that worries thousands of people at this season of the year.

It is impossible to be energetic if your blood is thin and weak, or if your nerves are frayed or shattered. You cannot compete with others if you do not get refreshing sleep at night, or if your appetite is poor or you are losing weight. You need a tonic at this time to add to your efficiency now, as well as to save you from suffering later on. And it is all the realm of medicine there is an better tonic than Dr. Williams' Pink Pills. These pills tone and enrich the blood which circulates through every portion of the body, strengthening faded nerves and invigorating worn-out muscles. They give you new strength and energy to weak, easily tired, despondent men, women and children.

Mrs. J. N. McNeill, Glace Bay, N.S., says: "For years past my home has never been without Dr. Williams' Pink Pills, and I have good reason to praise them highly. Following an attack of la grippe, I was left in a badly run down condition. I had no appetite and felt so weak I could scarcely go about the house. I was taking medicine but it was not helping me, and a friend advised me to try Dr. Williams' Pink Pills. I used them for a time with the most beneficial results. My appetite improved, my strength returned and I was soon able to do all my housework. I now take the pills every spring and find them a splendid strength-bringing tonic. I have recommended the pills to other friends who have used them with good results."

Dr. Williams' Pink Pills are a tonic, not a stimulant. They build up the blood, and through their use not only the disastrous after-effects of influenza but also troubles due to poor blood such as anemia, rheumatism, indigestion and the generally worn-out feeling that affects so many people, disappear. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50. From Dr. Williams' Medicine Co., Brockville, Ont.

Lumber Shortage in Alberta

Needs of Western Canada Should Be Considered First

Curtailed of the amount of lumber exported from Canada is the request which the Alberta Association of Architects has put before the federal government. Local architects assert that the situation is desperate if the big building program in sight for the coming season is to be carried out. The association urges that the needs of Western Canada should be considered first and the exportation of lumber to the United States prohibited or curtailed until such time as there is an adequate supply of lumber for future building undertakings in Canada.

The Right Course

Work of Instructing British Columbia's Farmers of Tomorrow

Agriculture under competent teachers along practical lines is taking an increasingly important position in the curriculum of the public schools in the different municipalities of the lower Fraser Valley of British Columbia.

At the present time the class in agriculture of one of the high schools are taking a course in the proper feeding of live stock and are getting an insight into the different values of the various kinds of feeds for cattle, horses and sheep.

Last month the pupils were gaining useful knowledge about soils, their properties and fertilization. Ten schools in the same district are busy preparing plans for the school gardens. Poultry raising and the care of calves and pigs are also on the school program.

The teaching of nature study in the class-rooms, the practical work of the school and home garden, and the engaging contests of school fairs are all factors which tend towards the development of the boys and girls of today, and will greatly assist them in becoming efficient farmers and farmers' wives in the coming years.

Canada's Tire Production Figures made public in Montreal show that there were about 2,000,000 automobile tires manufactured in Canada last year, requiring about 8,000,000 square yards, or 12,000,000 to 16,000,000 pounds of tire fabric, and that only about one third of the fabric required in the manufacture of these tires was made in Canada. The remainder came from the United States. Increased production of tire fabric is now aimed at.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn or corn between the toes, and the hard skin caluses from bottom of feet. A tiny bottle of "Freezone" costs little at any drug store; apply with good dress upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

SPRING IS LATE FEED IS HIGH

Are your horses fit to stand the grind of a hard season's work? Have you the feed to back them up?

If not, think how a good tractor would help you out. Not a sputtering, complicated, trouble-making truck motor on a tractor frame but a real, honest-to-goodness tractor, built by experienced tractor makers, a tractor that has proven by years of work that it is right all through.

The Rumely Oil Pull is such a tractor. It has ten years of success in the field behind it, ten years' evidence that it is right. It is the only tractor that is absolutely guaranteed to successfully burn kerosene at all loads from no load to full load under any and all conditions. Kerosene is high now and indications are that it will go higher. Kerosene is still comparatively cheap so it is mighty important that the tractor you buy should burn kerosene and keep doing it. The Oil Pull has proven years ago that it can burn kerosene successfully ALL the time.

Oil Pulls are of model, no water to freeze in jackets and radiator and cause costly repairs. They are built of quality materials and the working parts are finished like those of a high grade automobile. Heavy high duty roller bearings reduce friction, insuring maximum draw bar power in proportion to engine power. Parts are enclosed in dust yet readily accessible when required.

In a time of such a high contrast in Rumely Service is the best in the West, that means a lot to you when you are in a hurry.

We have a lot of information about Oil Pulls and tractors in general and we are always glad to loan you our literature. We will have an Oil Pull here in a few days. Come in and look it over.

U.S. Would Remove Turks From Europe

Washington.—The original position of the United States government, that the Turks should be expelled from Europe is restated in a note to the allied supreme council, which has been prepared at the state department and which will be transmitted soon.

The communication is in reply to an enquiry from the French and British governments as to the views of the United States on the Turkish settlement. The position of the United States government is understood to be that there is no sound reason for retaining the Turkish capital in Europe. The United States is said to take the view that the contention that the expulsion of the Turks might be resented by the Mohammedans is not supported by the facts since the war in the near east was won largely by the aid of Mohammedans.

The United States, it is understood, desire that Armenia be set up as an independent state and that it embrace as much territory as the Armenian government can control. It also takes the position that any arrangement that is made with regard to Turkey should guarantee to all nations equal opportunities for commerce and that no belligerent should be given paramount claims in any part of the near East.

The position of the United States, it is said is also that in any arrangement for the government of Constantinople and the Turkish states, a place for the participation of Russia should be made, as the United States government is convinced that no plan of settlement can be successful in the long run which does not take into account the interest of Russia in the matter.

To Restore Order

Ally to Allow Despatch of Ebert Forces Into Ruhr Valley Districts

Paris.—Two German officers, who arrived here from Berlin to explain to the allies the necessity for permitting the German army to enter the occupied zone to restore order, saw Premier Millerand and told him the Ebert government had ample forces ready to deal with the situation in the Ruhr valley. It is understood on good authority the allies have decided to give the permission. The French government would have preferred inter-allied action in the occupied zone, while the British and Italians favored German action for operations by the Germans. The French gave way on this point in view of the dependence of France on supplies of coal from the Ruhr district.

French coal production has decreased from the old figure of 40,000,000 tons to an average of about 18,000,000 tons yearly. By the terms of the treaty of Versailles Germany is bound to cover the deficiency up to a total of 20,000,000 a year. On the restoration of order in the Ruhr valley, therefore, depends largely the continuation of French industries.

Withdraw Chinese Troops in Siberia. Pekin.—The government has ordered the withdrawal of Chinese troops from Siberia. This important action is taken as indicating an accord with the powers relative to Russia, and also as tantamount to abrogating the Sino-Japanese military convention which provided for common action in case of invasion across the northern frontier.

Reprisals Threatened in Ireland. Queenstown.—The chairman of the district council has received a type-written communication warning him that he will be assassinated in the case of the shooting of any Queenstown policeman.

Will Keep Down

Lumber Prices

Manufacturers Will Do Everything Possible to Prevent Any New Advance

Calgary.—That there will be no further increase in the price of lumber if the manufacturer can possibly help it, was the statement of J. R. Poole, secretary of the Mountain Lumbermen's Association, today. Mr. Poole said that this decision had been arrived at notwithstanding the increased cost of production.

"If the manufacturers can control the situation the price of lumber will certainly not further advance," he definitely stated. Another matter which occupied considerable time of the convention was the gathering together of facts for presentation to the Canadian Board of Commerce, covering 1919 operations. These will be presented to the board in due course. Mr. Poole stated that these figures will prove conclusively that the manufacturers were not in the "profiteering" class.

Urges Energetic Steps To Enforce Treaty

Andre Tardieu Says France Has Been Lett By Burden

Paris.—An immediate meeting of allied leaders to decide upon energetic steps to insure enforcement of the treaty of Versailles was urged by Andre Tardieu, former commissioner of Franco-American relations, in an interview here.

"The treaty already appears to have been violated as much as any treaty could be," Tardieu said. "It is urged that the allied governments must decide upon immediate drastic steps."

Tardieu believed the difficulties in allied-German relations will continue to increase rapidly, and the allies decide upon immediate drastic steps, at once and enforce it firmly.

Enforcement of the treaty practically has been left to France, Tardieu said, and France's position is probably weakened by the movement of the peace conference to London. The recent "intermittent meetings" of the congress have been characterized neither by firmness "nor unity of direction," Tardieu believed.

Daniels Again Criticised

Statement That U.S. Navy Department Was in State of Chaos When War Was Declared

Washington.—Not only was the navy department without comprehensive plans for naval participation in a war when the United States severed relations with Germany, but Secretary Daniels disapproved the general plan drawn up by the bureau of operations and submitted in March, 1917, Chairman Harris Lansing, former assistant chief of navigation told the senate investigating committee.

As a result of this alleged lack of preparation, the witness said, the navy department was virtually in a state of chaos the day the United States entered the war.

Personal characteristics of Secretary Daniels often made it impossible to obtain approval of important plans and policies, Chairman Lansing asserted, as the personal interest taken by him in minor affairs "occupied so much time that he never had much left to give us for really important problems."

Chairman Lansing, at the time war was declared, said there was not a sufficient reserve.

Amerongen.—For the first time since the Kapp revolution, former Emperor William was permitted to leave Berch castle here. Guarded by two police officers he made a secret trip to Doorn in a closed automobile. His object was to view the progress of the work on his future residence at Doorn.

Lemieux Speaks On Bi-Lingual Question

Says Exclusionism is Not A Policy, But A Blunder

London.—The king today received the Hon. Rodolpho and Mrs. Lemieux, and handed them the military cross won by their son. Mr. Lemieux was later entertained by the House of Commons Association at Westminster, Sir Auckland Geddes presiding at the function. Mr. Lemieux spoke at length on the bi-lingual question, and said in part: "I am not speaking as a party man but as a Canadian who gave his all for the cause of small nationalities. From Sir Wilfrid Laurier I learned isolation and exclusionism is not a policy, but a blunder."

The gathering was largely attended by members of the House of Commons and the House of Lords, accepting including ex-primier Asquith, the Duke of Devonshire, Archbishop of Canterbury, Lord Bismarck, Lord Jellicoe, and Hon. Walter Long. General Seely and Mrs. Tilly were also present.

France May Retaliate

Further Decline in France Value Provoked Fresh Discussions

Paris.—Sharp declines in the value of the franc as compared with American dollar and the British pound sterling, while the German mark, despite disorders in the Ruhr district, made a substantial gain, have provoked the fresh discussion of the exchange situation and the renewal of talk of rigid restrictions on importations as a measure to check the depreciation of the franc. Financial authorities are of the opinion that restrictions afford the only immediate remedy and predict an early prohibition of all luxuries and articles which might be described as superfluous.

New Home For Former Crown Prince

Said to Have Declined Residence Near Exiled Father

The Hague.—The government by the premier today that the Dutch government had granted the Island of Wijk to the former German crown prince as a place of residence is believed here to complete the steps by which Holland seeks to meet allied demands to see the safe housing of former Emperor William and his son.

Reports are current that the crown prince asked that his residence be fixed on the island, and declined an opportunity to live near his father.

French Pence Loan

Paris.—Unofficial figures of the amount subscribed to the peace loan places the total at between 15,000,000 and 16,000,000,000 francs. There is a larger proportion of currency than in the former loans.

Soviets Are Still Active In German Revolt

Thoroughbreds From Royal Windsor Stable

Prices of Wales May Have Horses On Western Tracks at Summer Fairs

Saskatoon.—The Prince of Wales' thoroughbred race horses from Windsor stables, England, will probably be seen on the western Canadian race tracks during the big summer fairs this year.

J. Carole, manager of the Alberta ranch, which his Royal Highness purchased on his Canadian tour last summer, has gone east to superintend the unloading of the horses, which are expected to arrive from the old country in May or June.

The string now numbers seven thoroughbred animals, most of them two years old. They are of the purest English stock, and while they are being sent to Canada primarily for breeding purposes it is anticipated some of them will be raced around the western Canada, fair circuits this year.

Are Not All Soviets

Many Germans Are Fighting Against Government For Anti-Monarchist Movement

London.—Not all of the workmen who have taken up arms against the government in Germany are imbued with Spartan ideas, according to office today. Information gathered by British representatives in Germany last summer, workmen intent to fight until certain anti-monarchist representatives are included in the new cabinet. The Essen disturbances, which are the most serious in the country, are described, however, as purely Bolshevik.

The indications were, it is said, that the peace conference is gradually coming round to the British idea that the Germans should be left to settle their own internal troubles while the peace treaty is not violated.

To Banish Horses

Dusseldorf.—Henceforth to banish the horse from the streets is a bill now before the city council becomes a law. No horses, cattle, sheep or swine may after January 1, 1925, be kept in the city limits or driven on the streets.

Tink Leader is Arrested

Constantinople.—Ali Sait Fasha, military governor of Constantinople, has been arrested by the British forces in that city.

Leipzig.—Halle, the large industrial town just to the northwest of this city, is completely cut off from communication. Latest reports were that the troops had gained the upper hand after a considerable part of the city had been reduced to ruins.

Saxon troops to reinforce the government's contingent in Halle, are on the way there. In other nearby communities the turmoil terminated which had been existing for more than a week. As far as can be learned the workmen's revolt in this section is directed against the military elements and shows no Bolshevik tendencies. The single exception is the town of Falkenstein, southern Saxony, where a soviet is said to have been established by Communist leaders.

Both wings of the Socialist-Democrats are demanding the reservations of martial law and the withdrawal of the troops. These are among the workmen's principal demands.

In Leipzig the stone walls of the great railway station of the Volksstaat and dozens of buildings are pitted from top to bottom from machine gun and rifle fire, while hand grenades have left many ugly gouges.

The normal life of the city is being revived, but the stranger instantly detects a feeling of excitement and expectancy.

It is estimated that there are less than 1,000 Communists in Leipzig, although the Independent Socialists are very strong.

According to conservative estimates about 10,000 carried arms in Leipzig last week, and beginning with the first clash, March 15, when 17 persons were killed and 60 wounded, there was almost constant street fighting up to last Saturday.

Essen Is Now Normal

Soviet Government Leader Says He Does Not Fear Intervention From Allies

Amsterdam.—Conditions at Essen present a normal outward appearance except for the presence of armed labor guards, red flags, armored automobiles and a few bullet marks on the buildings, according to the correspondent of the Telegrafische who arrived at Dusseldorf. A member of the soviet government at Essen told the correspondent he had no fear of allied intervention so long as the allied nations were safe.

The correspondent found the soviet administration proclaiming the necessity of returning to work and admonishing against plundering.

Highland News

Fred Anderson is still hauling
lumber east for Mr. Giesemer.

Harvey McKnight is busy these
days hauling lumber for his house.

Dave Allan has been breaking
houses for Mr. C. B. Post of Bergen
this last week.

Mr. Ole Emerson is back on the
job again working at the mill. Mr.
Emerson was in Didsbury on a two
weeks vacation.

The Highland Lumber Company
have finished in the woods and are
only sawing what they have in the
yard and the permits which will keep
them going for some time yet.

Would you believe it? Mr. O. I.
Johannson of Bergen has again
come back and is running a saw mill
of his own at Bergen.

The creek in Nitche Valley is
level with the banks. We are wonder-
ing what Mr. Gamble will do
for a boat this spring.

Ira Gamble is looking out for a
large team of draft horses for his
spring crops. Maybe he will buy a
team of Grandpa Rhonda.

It is rumored that Mr. Joseph of
Highland is coming back to the
timber again. He has been farm-
ing near Medicine Hat for the past
three years.

Perceval Blain, of Elkton, who
has taken a soldier's grant of one
hundred and sixty acres in Nitche
Valley, intends to build shortly.
He is buying his logs and fence
posts cut now. It is hoped he
moves out soon.

They say that J. C. Waterstreet
has made a fine thing out of trapping
this season, as he has over a dozen
weasels and fourteen flying squirrels
and one coon. J. C. says he is
looking forward with great joy to
the next season if it is as good as
this year.

FARMERS BREED PERCHERONS

The only breed of draft horses ever shipped back to England from Canada for breeding purposes were Percherons. The greatest breed of draft horses in North America are Percherons. The safest investment in draft horses today is Percherons. A profit to own—a pleasure to handle. You will make no mistake in your horse breeding this year if you use a Percheron sire.

Storm Loss of Ten Millions

Officials of the Nova Scotia Highways Board today stated that the damage to the bridges in Annapolis county during the recent floods will be at least ten million dollars and that it will be months before vehicle traffic across the Annapolis and Lequille rivers can be resumed. Four steel bridges, two wooden bridges, and at least a dozen smaller ones were demolished to a greater or less degree.

**And His Family Medicines**

MOST people first knew Dr. Chase through his Receipt Book. Its reliability and usefulness made him friends everywhere.

When he put his Nerve Food, Kidney-Liver Pills and other medicines on the market they received a hearty welcome, and their exceptional merit has kept them high in the public esteem.

Take Dr. Chase's Kidney-Liver Pills for example. There is no treatment to be compared to them as a means of regulating the liver, kidneys and bowels and curing constipation, biliousness, kidney disease and indigestion.

New Star Discovered

Discovery of a new star, the sixth in the constellation of Sagittarius, was announced by the Harvard College Observatory recently. The Nova was found by Miss Wood of the observatory staff on photo plates taken in 1905. It does not appear on recent plates.

He Says They Are Surely The Best

FRANK HANNON SWEARS BY DODD'S KIDNEY PILLS

States that they cured his backache after other medicines had failed and that he would not be without them. Corcoran, Joliet Co., Que., March 28.—(Special).—Claiming that he is completely cured of backache from which he was a severe sufferer, Mr. Frank Hannon, a well-known resident here, is shouting the praises of Dodd's Kidney Pills.

"After trying various medicines for my backache," Mr. Hannon states, "I finally bought a supply of Dodd's Kidney Pills. From the start of the treatment I felt benefited and now I am completely cured."

"I therefore proclaim Dodd's Kidney Pills the finest on the market. I would not be without them." Dodd's Kidney Pills strike right at the seat of the trouble, the kidneys. They are a supply of pure and purely a kidney remedy. But as cured kidneys strain all the impurities, all the acids of disease, out of the blood, Dodd's Kidney Pills naturally get credit for curing a number of different diseases.

Ask your neighbors about Dodd's Kidney Pills.

Women's Institutes

In Alberta

Increased During the Past Year By More Than Three Thousand

The steadily increasing influence and importance in the life of the province of the Women's Institutes in Alberta was demonstrated at their first annual convention held at Edmonton.

In the course of the convention the superintendent made the statement that the membership of these institutes had increased during the past year by more than three thousand, making a total of 13,150 members in the province and giving Alberta the second largest institute in Canada.

An immense amount of work has been done by these institutes, especially in the rural settlements, where their effect is particularly beneficial. The curriculum includes lectures and demonstrations in dozens of different lines: there were fifty-four short courses of instruction in home nursing, care of the sick, and first aid, which were delivered by the provincial health nurses of the department of health. Twenty-one demonstrations were given. Sixteen short courses in cookery, and numerous other demonstrations and lectures in rural sociology, legal status of women, civics, improved schools, the feeding and health of children, etc. In addition to this, an immense amount of relief work has been carried on and thousands of dollars raised throughout the province, distributed for this purpose.

Health is real wealth.

Breeding Draft Horses

Demand for Heavy Draft Animals Was Never Better

From reports received from every part of the country it is apparent that there are fewer good draft colts from one to three years of age than ever before. The country is overstocked with light nondescript colts and horses for which there is no demand and for which there is not likely to be any great demand in the future. The world is short of heavy draft animals, and the outlook for good prices for this class of stock weighing from 1,650 to 2,000 lbs. at maturity was never better. France alone of the European countries is in the market for 60,000 heavy draft horses, for which they will pay good prices.

Farmers and breeders should not fail to breed every good draft mare available this year, and they should be bred to the biggest draft stallion available. Breed is not so important as size, quality and weight. The breeds that produce these desirable qualities with greatest uniformity may be listed in the following order: Percherons, Belgians and Clydesdales. Breeders desirous of purchasing good sires should select not only good individual stallions, but they should see to it that they are bred from good families of mares, and if possible should purchase Canadian western bred horses, that have been acclimated. The curse of the heavy horse breeding industry in Western Canada has been the importations and sale of cheap fat stallions of poor ancestry. Farmers should breed only from the best if they wish to produce desirable draft horses for the future.—By Prof. W. L. Carlyle.

Intelligence of Horses

A Pony That is Credited With the Best of Table Manners

The high intelligence of horses was superbly demonstrated during the war and some day a lover of the horse will recall the many wonderful incidents in which he played a leading part. One of these will be the vignette of a Canadian General's thoroughbred, which again and again refused to budge to the spur at times when there was apparently no evidence of the slightest danger. Twice he saved his master's life by deliberate acts of insubordination. The latest yarn about a pony that had a race-track reputation is worth repeating in this connection. Every morning his owner brought this pony into the dining-room of the house in which he was billeted, and led him round the table. The pony was offered all sorts of dainties, but he would only touch slices of bread and butter, of which he was inordinately fond. It was not a big room, and there was not much space between the wall and the table, so if he had shown any restlessness the table and all that was on it must have been demolished. He, however, behaved always with the manners of a retriever dog, and only the slices of bread and butter had to be replenished.

Wantmore Peanut Cookies

One-fourth cup butter (soft), one-half cup sugar, one egg beaten without separating white and yolk, one cup Powder's Wantmore Blandish Sifted Peanuts, two tablespoons of milk, three-fourths cup of flour.

Cream the butter gradually, beating in the sugar, egg, milk and flour sifted with one teaspoonful of baking powder. Chop the nuts fine and add them to the mixture. Drop on a buttered tin a teaspoonful on one place; bake in a moderate oven. This recipe makes two dozen small cakes. Be sure and use Powder's Wantmore Sifted Peanuts, as no other peanuts make them so good.

ed the approval of the supreme council. Andrew Bonar Law replied that any action which the United States may have seen fit to take in this matter could not suitably be the subject of question and answer in the house.

**A Happy Family**

BY DR. S. C. BOWERS.

A happy family is one that can sit down to the table with keen appetites and good cheer. Plenty of the cut-of-doors and cleanliness, inside and outside of the body, will make for health, wealth and happiness. Your doctor will tell you that anything from a headache to the most serious illness may result from allowing food to ferment in the intestines. The first thing to do in case you feel mean, lousy, dull, perhaps feverish, is to flush the liver and kidneys, drink plenty of water, and take a dose of castor oil, or something better, made of May-apple, aloin and jalap, and long sold by almost every druggist as Dr. Pierce's Pleasant Pellets. This may save you from a fit of sickness, remove the poisons from the system and give the tissues of the body a chance to build up and resist disease.

People are realizing more and more that the kidneys, just as do the bowels, need to be flushed occasionally. The kidneys are an eliminative organ and are constantly working, separating the poisons from the blood. Uric acid backs up into the system, causing rheumatism, neuralgia, dropsy and many other serious disturbances.

This can be avoided by stimulating the kidneys to increased action, and because of its tonic effect on these organs I would advise any one to get Anurio (anti-uric-acid) which is to be had nowadays for fifty cents, at almost any drug store.

No money which bears the government stamp is irredeemable. There are no greenbacks, no bills, so polluted that they are not redeemable. So, no matter how soiled, how tattered, how polluted it may be, no human being who bears the stamp of his master's image, is irredeemable. No man can stoop so low, can be so vile, can be such a criminal that the divine image in him is effaced. That is inviolable, indestructible, immortal. God's image cannot be stamped out of His creation and it will be redeemed.—Genevieve Parkhurst.
